

SUMMONS

In the District Court of the Fifth Judicial District of the State of Nevada, in and for the County of Nye.

Florence Madeline Lewis, Plaintiff, vs. Edwin James Francis Lewis, Defendant.

State of Nevada, sends greetings to said defendant.

You are hereby summoned to appear within 10 days after the service of this summons upon you, if served within said Nye County, or within twenty days if served out of said County, but within said Judicial District, and in all other cases, within 30 days, exclusive of the day of service, and defend the above entitled action. This action is brought to dissolve the bonds of matrimony existing between plaintiff and defendant upon the grounds of extreme cruelty, by said defendant inflicted upon said plaintiff, all as more particularly set forth in plaintiff's verified complaint on file in the above entitled court and cause.

Dated January 15th, 1922.

WM. FORMAN,
Attorney for Plaintiff.

118-M1w.

NEVADA HAS CLAIMS ON COLORADO RIVER GREAT IMPORTANCE

By Letson Balliet.

Do the people of Nevada realize the value of the Colorado river to this state?

Roosevelt tried years before the war to interest people of this nation in "ship subsidies and preparedness" and few would listen to him. The greatest peace advocate in the world was accused of being for war, just because he wanted to be ready when it did come. Now we see what it cost this nation for its unpreparedness.

So will Nevada wake up some day to find that this great power asset is otherwise cornered, and we will have to pay for the right to use any part of it.

The Colorado river carries 10,000 cubic feet of water per second, even at low water periods. Occasionally it has been known to drop to 8000 second feet at The Needles, but this is but for a few days in January when the snow-covered mountains of Colorado are frozen.

The Colorado river is formed by the junction of the Green and Grand rivers of Colorado, and fed by the melting snows of the Rockies. The flood water period is in June and July, at which time the river carries as high as 160,000 cubic feet per second, and gradually decreases in volume through August, September, October and November, reaching the low water period in January and February, when there is no water nor power needed for irrigation purposes. During the period when water

is most needed there is four or five times more power than the low water power possibilities.

Do you realize that there is not a single stream of water that rises in Nevada, nor crosses Nevada, to carry one drop of moisture out of the state? All the rain and snow that falls in Nevada sinks through the soil to bedrock. All the valleys between the various mountain ranges of the state have watercourses beneath the surface at some depth. Nearly all of this valley land would be productive if the water was pumped to the surface and used, and the Colorado river can pump it.

The Colorado river has possibilities for "step plants" every few miles all the way up the canyon to the junction of the Green and Grand rivers. The power from Boulder canyon or Black canyon, or any other place along the Nevada stretch of the river, can easily be transmitted across the state of Nevada.

Mr. Ford and Mr. Edison promise to carry the Muscle Shoals power for a radius of 300 miles from that plant. Three hundred miles of transmission lines from the Colorado would reach the Southern Pacific through Ely and eastern Nevada. It would reach Tonopah, Goldfield, Pahrump, Tybo, Round Mountain and almost to Austin and Eureka. It would electrify the Salt Lake & Los Angeles road for enough northward to meet the Utah power lines, and far enough southwest to reach the

southern California power lines. It could be "tied in" with the Nevada California Power company lines, with the southern California power companies and with the Utah power companies, and could even be "tied in" with the Truckee river power and the San Joaquin power could cross the Sierras and connect Truckee river, Feather river and Pitt river plants are already connected, or are so planned as to be quickly connected.

This may seem a big undertaking, and it is, but the Oregon power companies of Portland are already connected with the California companies, forming a circuit from Imperial valley through Los Angeles, San Francisco, Oakland, Portland and within reach of the Seattle power companies in Washington.

Eventually this will mean that everything from Great Falls, Montana, through Spokane, Seattle, Portland, California and Nevada will be connected with the Colorado, and perhaps through Utah and Idaho and Snake river power back to Great Falls, with all these great projects pouring their electric energy into the interconnecting circuits.

Can you realize what this means to Nevada? Do you want to be left out, with power all around the state and not a power river of any consequence inside its borders?

I haven't space to more than mention the electric smelting, electric foundry work, brass and bronze factories, with the copper and zinc metals of Nevada, as needing the electrical energy.

Henry Ford proposes to take the alumina deposits from Utah, within reach of the Colorado power, and haul it to Alabama to electrically smelt it. Why?

How much power will the Colorado river make.

Step plants on the Colorado will produce more power than the combined plants built and proposed of Niagara, the Mississippi and Muscle Shoals combined. Get the importance of that. It is true that the 60,000-volt lines now reaching the Nevada desert are not high enough to cover this transmission artery, but 200,000-volt lines are already practicable and even 300,000-volt lines are now within the reach of the electrical engineers. There has also been two demonstrations of 1,000,000-volt transmissions, but there are many things to be perfected in this research work before such high potentials will be practical. However, 300,000 volts will take the Colorado power entirely across the state of Nevada, and that is possible today. That would make electric power available for every foot of railroad in the state of Nevada, where it is needed, and in addition would irrigate the land and make Nevada a rich agricultural state, comparable with the results obtained by irrigation in the Imperial and Los Vegas valleys. Twenty years ago this transmission would not have been considered possible; today it is within the reach of the engineers.

Los Angeles is working to take 2,000,000 horsepower into that city so that she can offer electric energy for from 1/2 to 3/4 cents per horsepower hour, as an inducement to manufacturers to locate there, and the city is even now contemplating building a ship canal from tidewater into the city to bring deep water ships to Los Angeles.

Modern dredging machinery will make that 25 miles of canal through the sand in a very short time. Twenty-five dredgers put to work can each dredge out a mile of the big ditch with no great cost nor delay. Los Angeles will then have salt water shipping, cheap power, cheap water from Bishop creek and an ideal climate for manufacturing. San Francisco and Oakland are asleep at the switch and watching Los Angeles go after the power. But Nevada will be a desert proper in another 20 years if she does not insist that the Colorado power be taken across the state, with a primary right to use 50 per cent of the power generated in the plants located on the Nevada border. If you do not look for the future, Nevada will have no future. Similar benefits will lie in the project for Arizona.

It is what is just under their hair that establishes the real qualifications for any sort of duty.

Brains are all one color. If the color of hair determined ability what would become of the misfortunates who haven't any hair at all?

Never mind about your hair, young lady readers. Don't bother about its color, and don't spend too much time "fixing" it.

If you are to be anxious about anything, be anxious about the inside of your head instead of the outside. That's the side that counts.

The Diamond Trade.

Considerable activity has prevailed to the diamond trade in British Guiana within the last few months, and prices have advanced to a high level heretofore unknown, states Consul McCann in his formal report. Expeditions are being dispatched to the diamond fields in the interior by those interested in the business in Georgetown. It is currently reported that the English market is eager to absorb any quantity of stones, large or small, but that they are being bought not only for English but also for American markets regardless of present exceptionally high prices.

New Even to Teacher.

James and been out of school several days and his teacher wrote his mother a note asking what was wrong with him. Back came this answer:

"Miss Teacher—James is very sick and I had to have the doctor for him. He says to keep James home for several weeks, for he has inflammation on the stomach and bowels."

WHIPPING POST IN WASHINGTON IS SUGGESTED

(By Associated Press)

TACOMA, Wash., Feb. 1.—Establishment of public whipping posts in Washington state will be urged before the next legislature by Justice John W. Link, he announced following hearing of a recent case in his court.

The case involved a man charged with neglecting his wife and three children while he spent all his money on himself.

"I don't care what your name is," said the state judge, "but it ought to be 'Mud'. Any man with a heart wouldn't let his children go hungry while he is away making his own living. If it were in my power I would send you to a whipping post."

and I am going to recommend to the legislature that the whipping post should be re-established for such characters as you."

The man was sentenced to six months in jail with the addition that he remain there until he put up \$500 bond to support his family.

YOU!

should investigate The Bonanza's new AUTOCASER ADVERTISING SERVICE.

We receive tri-weekly service and are prepared to furnish cuts showing the latest creations in wearing apparel for men, women and children; also catchy service touching upon autos, and all other lines of business.

CASTING SERVICE IS FREE

We make no charge for this Casting Service. The cuts are furnished free to our advertisers.

Call at this office or phone the advertising department, and you will gladly be shown samples.

SERVICE IS UNEQUALLED

AUTOCASER SERVICE is in a class by itself. The Bonanza has installed the latest AUTOCASER, and prompt service is assured.

LET US HELP YOU INCREASE YOUR BUSINESS

IMPORTANT NOTICE

To Secretaries of Corporations Doing Business in Nevada But Incorporated in Other States

OUR CHARGE \$9.00

SECTION 1.—All foreign corporations doing business in the State of Nevada shall, not later than the month of March in each year, beginning in the year 1914, publish a statement of their last year's business in some newspaper published in the State of Nevada. If published in a daily newspaper, such statement shall be published for a period of one week; or if published in a semi-weekly or tri-weekly newspaper, for a period of two weeks; or if published in a weekly newspaper for a period of four weeks.

SECTION 2.—The secretary of the company publishing the statement shall file a copy with the assessor of each county of the State of Nevada, in which said company is doing business.

SECTION 4.—Any district attorney in the state is competent to sue to recover the penalty, or the attorney general. The first county suing through its district attorney shall secure the penalty, and if no suit is brought for the penalty by any district the State shall have the right to recover through its attorney general.

The TONOPAH DAILY BONANZA will make publication required by law, which includes the filing of a sworn affidavit of publication with the assessor of each of the counties of the State, within which the company is doing business; an affidavit of publication will also be furnished secretaries.
